Bachelor of Information Systems

ABOUT ME

I'm a technology lover and exploring its resources to solve problems is motivating. I have a bachelor's degree in Information Systems and my professional goal is to be a Software Developer. Currently, I'm focused on web systems, specifically on the Back End side. I have a good grounding in the concepts of the object-oriented paradigm, during college, I studied and applied these concepts using languages such as Java and PHP. In my job, I help the developers on projects focused on GIS technologies, we use Python a lot and relational databases like Oracle, Postgres and Sqlite.

EDUCATION

Graduation in Information Systems

Unifactus University Center | 2018 - 2022

WORK EXPERIENCE

Technology Assistant - Geotechnology

Delta Sucroenergia Plant | Oct/2021 - Currently

- Develop new scripts or modify existing scripts to add new features.
- Manage relational databases for spatial data such as Postgis.
- Develop task enhancements and automations for them.
- Work with GIS software such as ArcGIS and Qgis.
- Map, analyze and disseminate geospatial reports.

TECHNICAL SKILLS

- **Python:** I'm able to develop small projects and plugins for GIS frameworks, exploiting packages, libraries and database connections.
- **PHP:** For me, it's the most familiar web language, I have the competence seal on LinkedIn and store some code from small projects and challenges on github.
- **SQL:** It's essential in my day to day work, tasks that require knowledge in Joins, Triggers, Procedures and spatial functions are part of the routine.
- **Git:** I have the knowledge to understand the basics and use the main git commands
- **Frameworks:** I have studied and practiced with Bootstrap, Spring, React, and am currently focused on Django.

PERSONAL SKILLS

- English: Intermediate
- High learning capacity
- Interest in challenges
- Attention and focus
- Responsibility
- Discipline
